WHAT IS COURTBOT?

PTA meetings, doctor's appointments, even court dates—when life gets hectic, reminders help. **COURTBOT** is a text-message app that helps keep everything on track.

After cases are booked, clients can text their case number to **COURTBOT** to receive automatic reminders of court dates.

LESS BUREAUCRACY

Around 25% of the people in Tulsa County Jail are waiting for their cases to be heard, costing taxpayers up to $25,000 per day.

Research shows that reminders work. More small fines are collected, and jail space is freed for more serious offenders.

FEWER FINES

Failure-to-appear and failure-to-pay fines can quickly snowball, especially for those living paycheck-to-paycheck. CourtBot helps clients avoid mistakes that burden them and the criminal justice system.

Government done well can help.
